Javascript
Git,GitHub
Redux Toolkit
Gsap
MYSQL

Problem-solving
Typescript
Nextjs
Tailwind
Shadcn, MaterialUI

Briefcase

Becks Insurance, <https://gasser1-project1.surge.sh>

That is my first project with html and css only just a static site with one page only

My portfolio, <https://gassers-portfolio.netlify.app>

It's a simple portfolio with simple animation using gsap with good performance and empty from the vulnerability like xss.

Ai Bot , <https://ai-bot1.netlify.app>

Ai simulator without ai integration with a simple design and linking the firebase with the website to create a great authorization for the website.

E-commerce, <https://e-commerce-gasser-devs-projects.vercel.app>

Uncompleted e-commerce but It will be a great website with shaden components and animations with gsap with smooth navigation with react router dom.
